

# Preen®

## PREMIUM WEED CONTROL FABRIC

- Chemical-free weed control.
- Superior strength.
- Provides healthy environment for plants.
  - Allows water & essential nutrients to flow back to plant.
  - Blocks weed growth
- Conserves soil moisture
- Use in areas landscaped with trees, shrubs and perennials, or under decks, pathways, beneath brick or stone patios.
- Use with mulch for maximum benefit.

## 25 Year Guarantee

### EASY-TO-INSTALL INSTRUCTIONS

1. Remove weeds and grasses from planting area.

2. Unroll Weed Control Fabric. Be sure adjacent sections overlap 2" to 3".

3. With new plantings, install Weed Control Fabric first, then cut x's in fabric for plant placement.

If existing plants are taller than 3 feet, cut Weed Control Fabric to the edge and slide around base of plant.

If smaller plants are present, lay Weed Control Fabric on top of plants and cut an x or circle over each plant and gently push fabric over the top, down to the soil.

4. Anchor edges and seams with Fabric Pins. Apply 2" to 3" of mulch or stone, deep enough to cover fabric.

### Preen Works, So You Don't Have To.®

Preen Weed Control Fabric is a foundation for an effective weed control program. Landscape fabric is not a complete, long-term weed control solution by itself. Preen Weed Control Fabric is strong and durable yet flexible enough to easily cut and install.

Weed Control Fabric is an important part of effective weed control. In order for weeds to grow, seeds must have contact with the soil, as well as exposure to sun, air and water. Preen Weed Control Fabric interferes with this process by eliminating the contact seeds have to soil and sunlight. Because the fabric is porous, water and air can pass through it, providing the nutrients necessary for existing plants. Weed Control Fabric keeps sunlight from reaching the weed seeds underneath the fabric. Use of mulch is recommended as the fabric will not withstand UV rays alone, and must be covered to prevent degradation. Because of the organic nature of mulch, weed seeds may be present. Weed Control Fabric cannot keep shallow rooted weeds from sprouting above the fabric.

Regular use of Preen Garden Weed Preventer or Preen Vegetable Garden Weed Preventer in mulched beds or vegetable gardens prevents weed seeds in the mulch from sprouting.

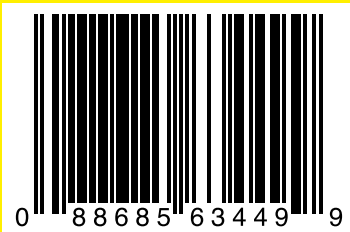

**Full Refund Warranty:** Lebanon Seaboard Corporation guarantees you will be satisfied with the performance of this product when used as directed, or your money back. If not satisfied, describe the nature of your problem, and send with proof of purchase to Lebanon Seaboard Corporation, 1600 E. Cumberland Street, Lebanon, PA 17042.

Note: To the extent consistent with applicable law, Buyer assumes responsibility for safety and performance if this product is not used according to the directions.
